

IBP Monitoring and Evaluation Task Team Terms of Reference

According to the 2011-2016 IBP Strategic Plan, over the next five years, the IBP Consortium, has committed to utilizing a Results Based Management (RBM) approach, which brings results to the center of the planning and management processes. The IBP Strategic Planning and Steering Committees developed the IBP Results Framework that serves as the foundation of this approach. The results within it compose a strategy and are designed to reflect IBP's manageable interest over a 5-year time frame. Specifically, the IBP RF is oriented toward two major groups of results: one at the country level (outward-focused and represented in blue) and the other at the IBP Consortium level (inward-focused and represented in yellow). Three results considered critical to increasing the performance of the IBP Consortium are:

- Improved organizational infrastructure
- Improved IBP methods to facilitate the implementation of FP/RH EPs
- Improved IBP KM Methods.

The IBP Secretariat is convening the M&E Task Team to perform the following functions:

- Provide overall guidance to the IBP Consortium in Monitoring and Evaluation issues, both global and at focus country levels
- Identify performance indicators to measure progress
- Develop system to collect and analyze and manage data
- Develop M&E plan for IBP strategic plan and workplan
- Develop a performance management plan (PMP)

Members of M&E Task Team

- IBP Secretariat
- KM Task Team designee
- RM Task Team designee
- Fostering Change Task Team designee
- IntraHealth
- Population Council
- MEASURE
- Jhpiego
- E2A
